## How to open the .fig file?

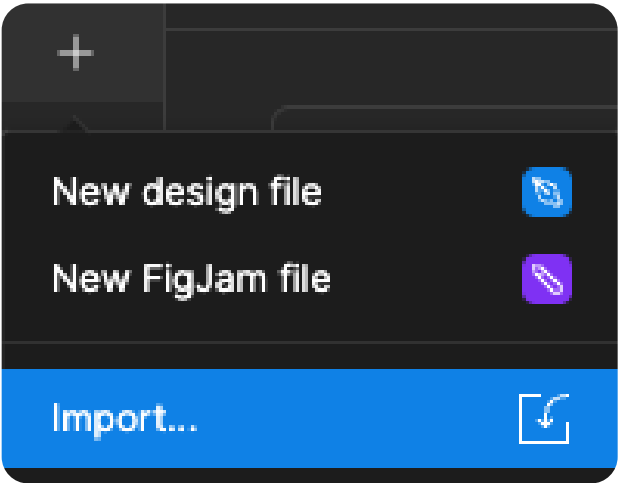

### 1. Download and install the Figma app to your computer

<https://www.figma.com/downloads/>

### 2. Import the .fig file

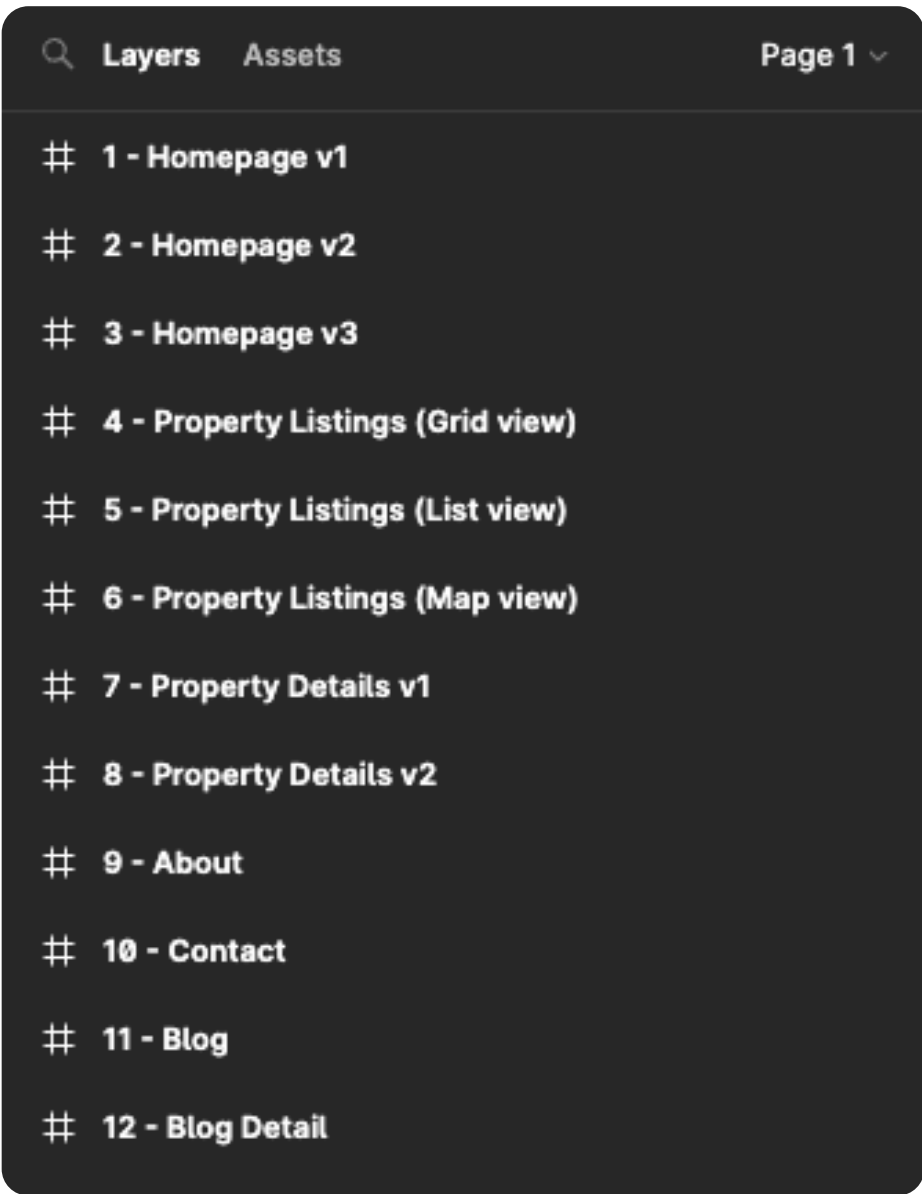

Go the **home** tab menu and click icon “+” from the Drafts menu

Click the **Import** menu and locate the .fig file you just downloaded.

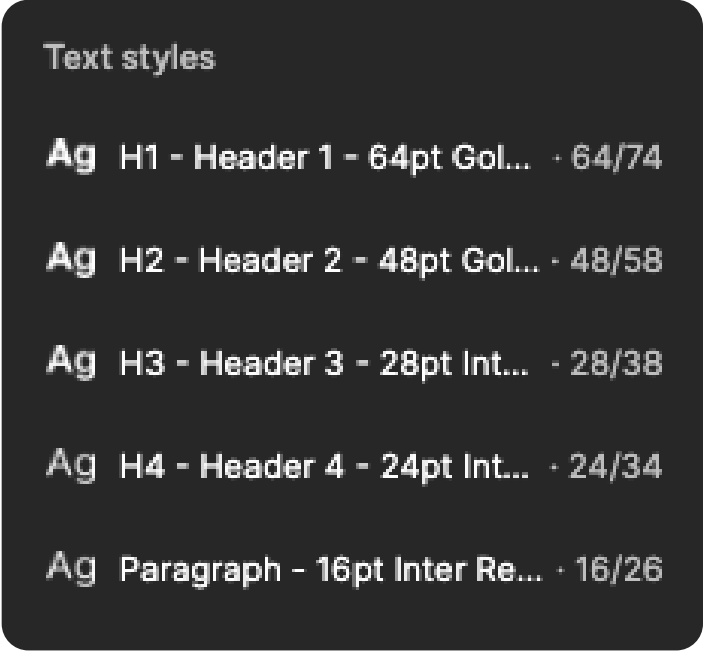

## Figma file configuration

### 1. Pages and Layers

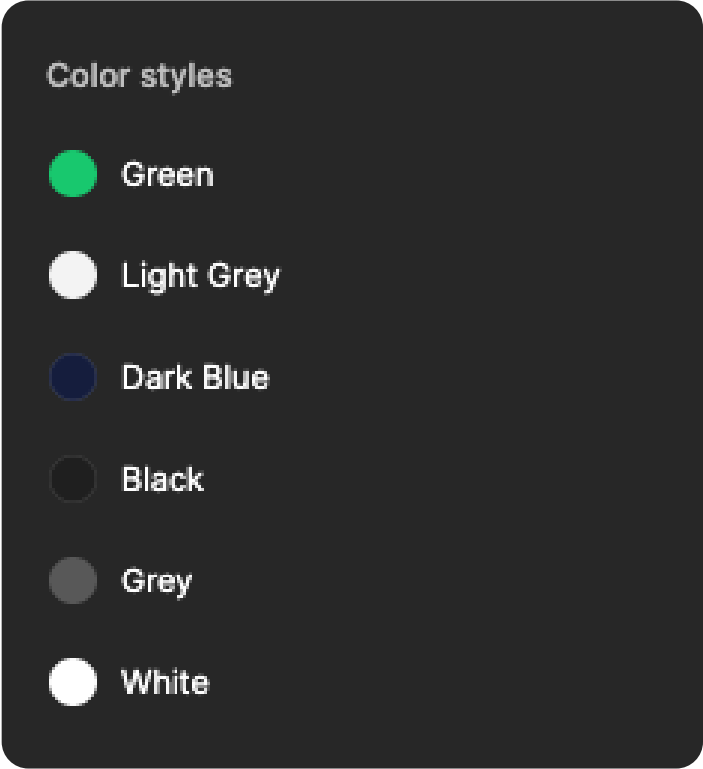

Once you have successfully imported the figma file, you will find the structure of the pages like the screenshot attached.

## 2. Text Styles

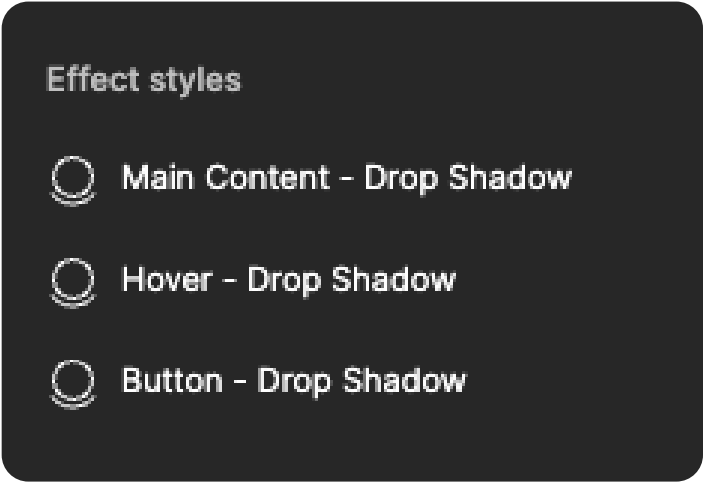

You can find the Text styles for this template. We have created H1, H2, H3, H4 and P styles

## 3. Color Styles

For the color styles, you can find the configuration for the primary color, secondary color, and tertiary colors.

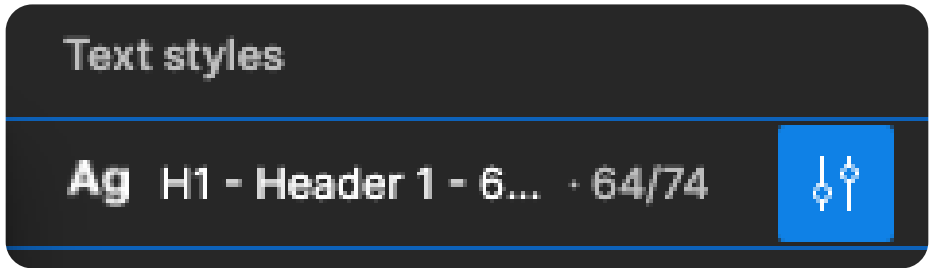

## 4. Effect Styles

You can also find the effect styles configuration like Main content drop shadow, Hover shadow, and Button shadow.

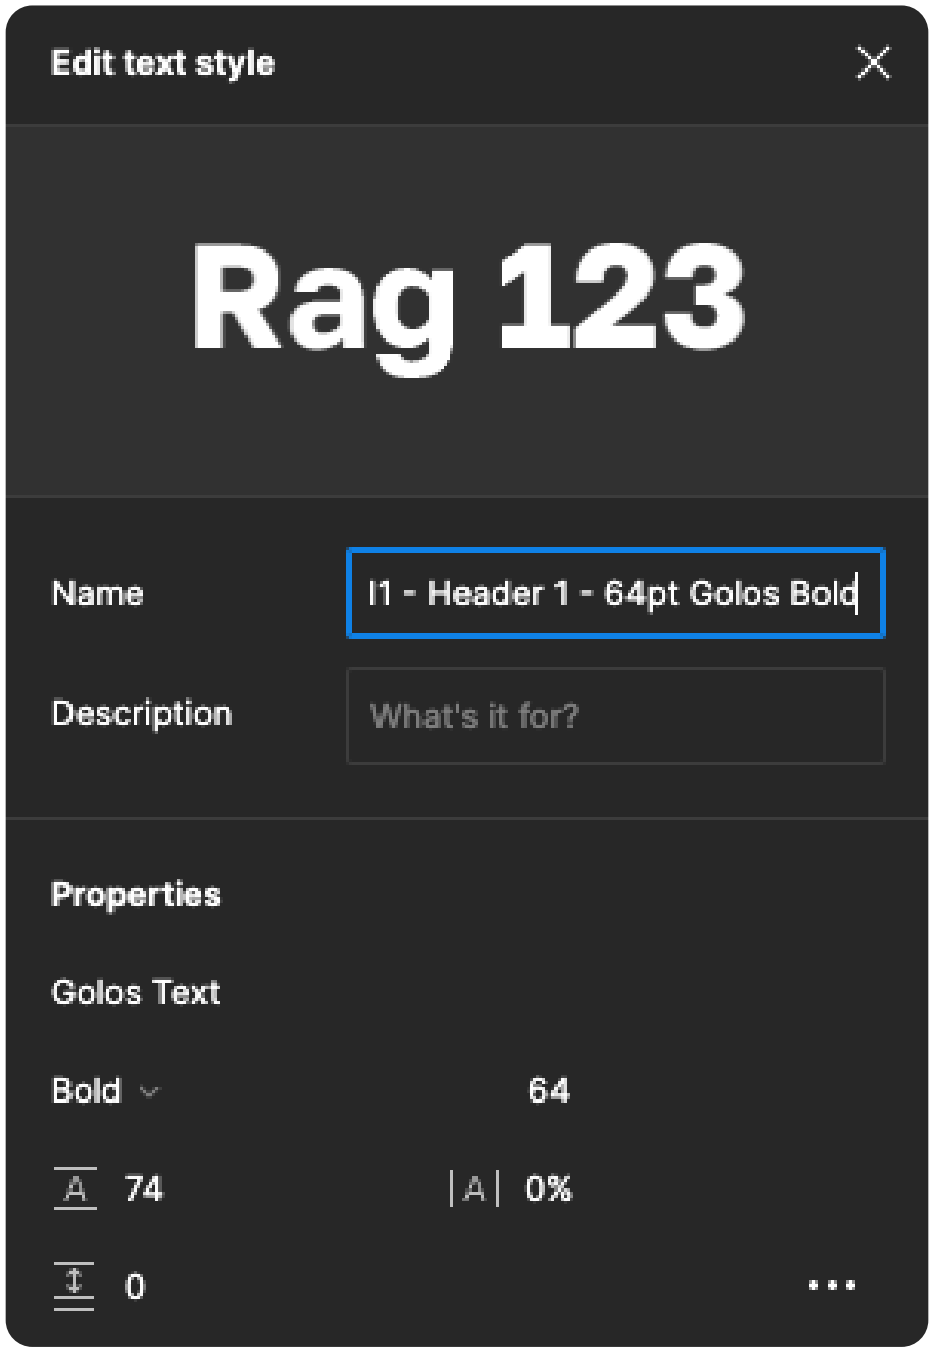

## How to edit the styles?

### 1. Edit the text styles

To edit the text style, click the configuration icon.

### 2. Edit the text properties

You can edit the font name, weight, size, etc.

Once you edit this configuration, all text that uses this configuration will be automatically adjusted.

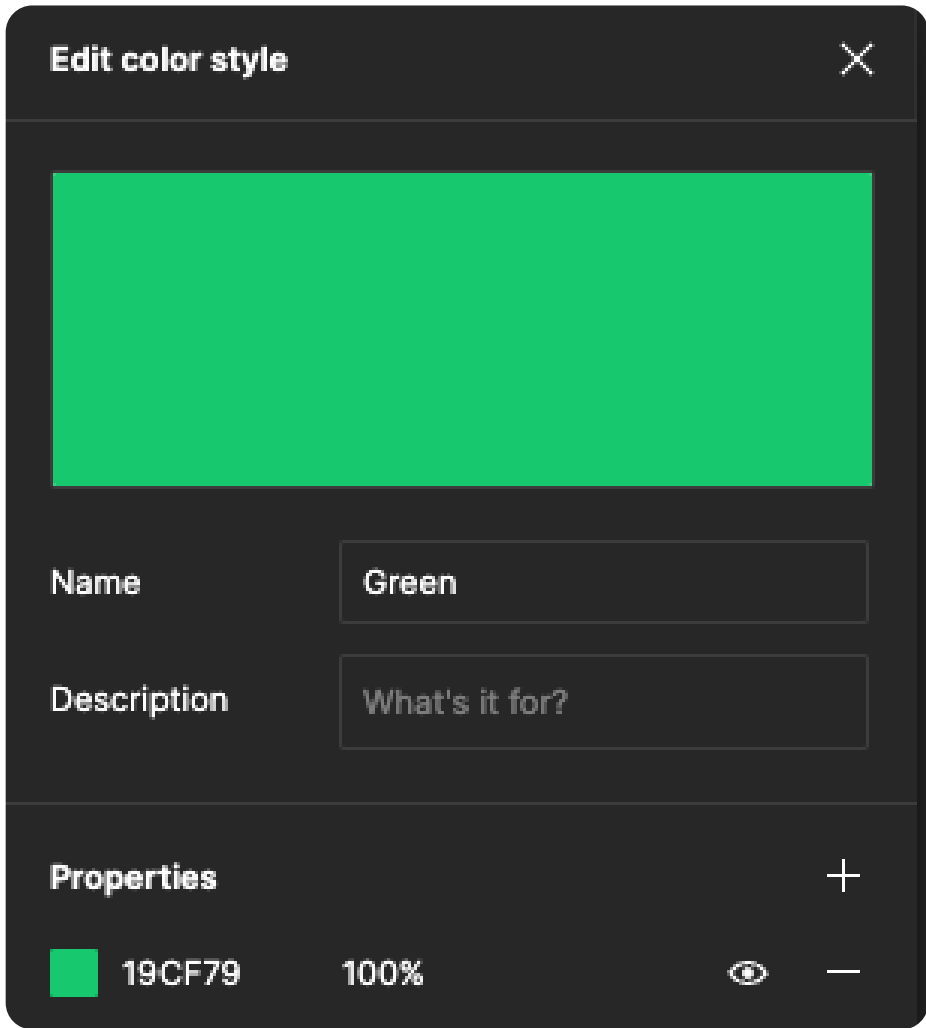

## How to edit the styles?

### 1. Edit the color styles

To edit the color style, click the configuration icon.

### 2. Edit the color properties

You can edit the color hex code, opacity, and color name.

Once you edit this configuration, all colors that use this configuration will be automatically adjusted.
