How to open the .fig file?

1. Download and install the Figma app to your computer

<https://www.figma.com/downloads/>

2. Import the .fig file

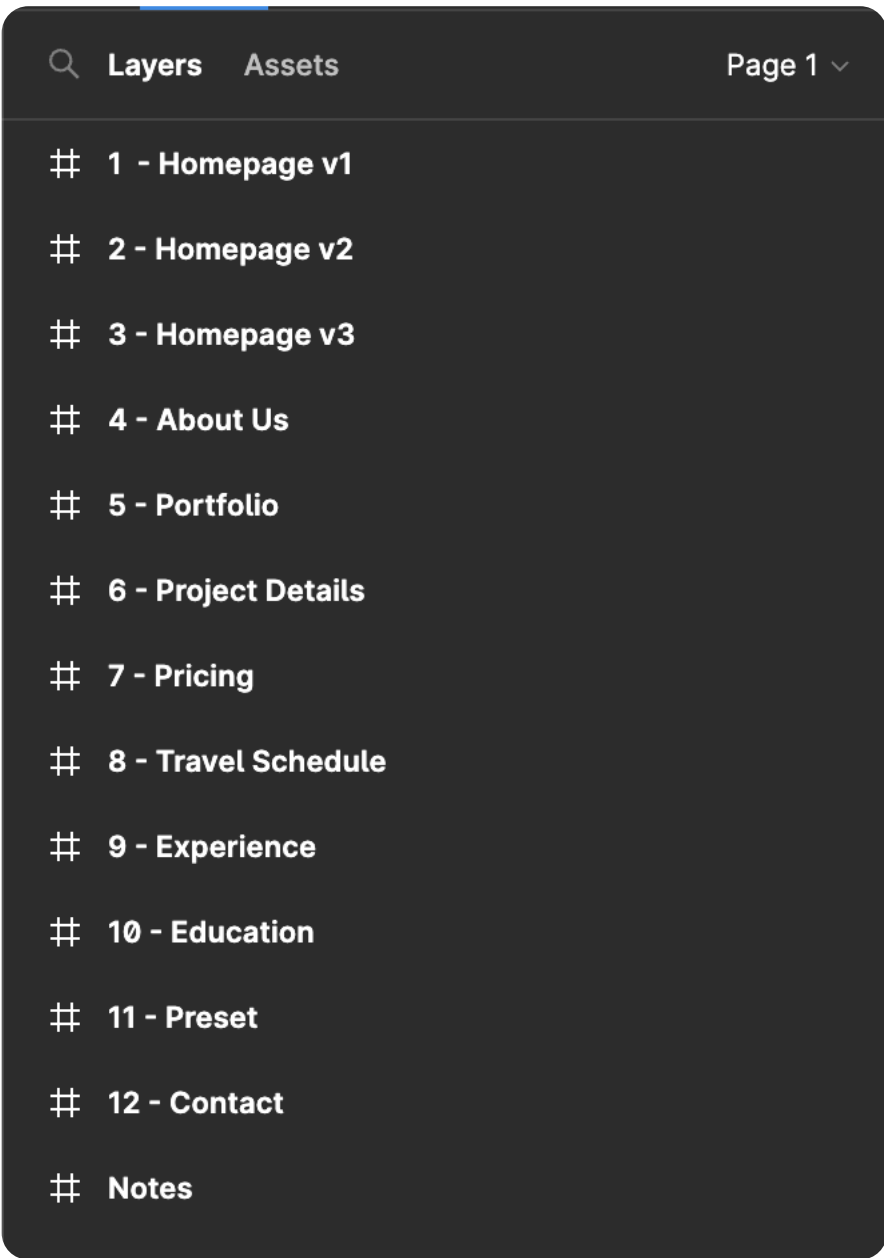

Go the **home** tab menu and click icon “+” from the Drafts menu

Click the **Import** menu and locate the .fig file you just downloaded.

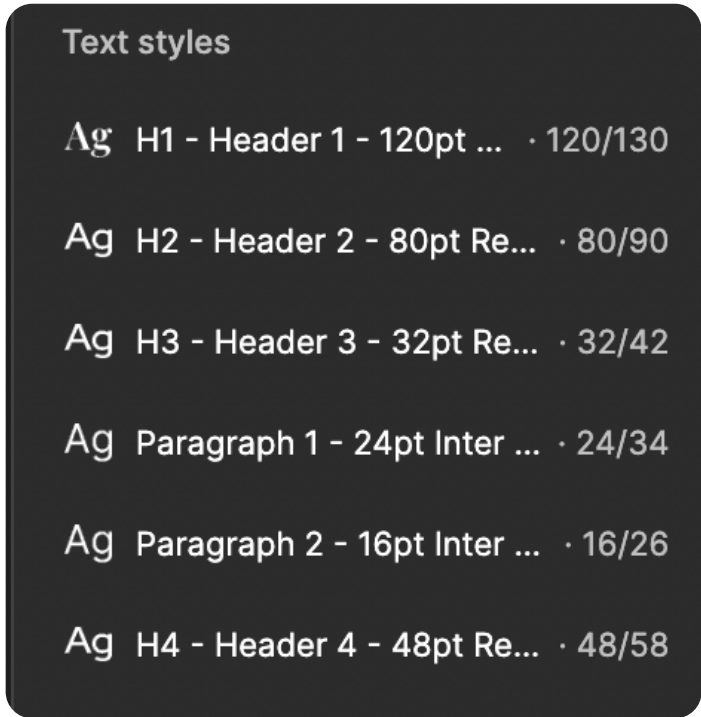

Figma file configuration

1. Pages and Layers

Once you have successfully imported the figma file, you will find the structure of the pages like the screenshot attached.

2. Text Styles

You can find the Text styles for this template.
We have created H1, H2, H3, H4 and P styles

3. Color Styles

For the color styles, you can find the configuration for the primary color, secondary color, and tertiary colors.

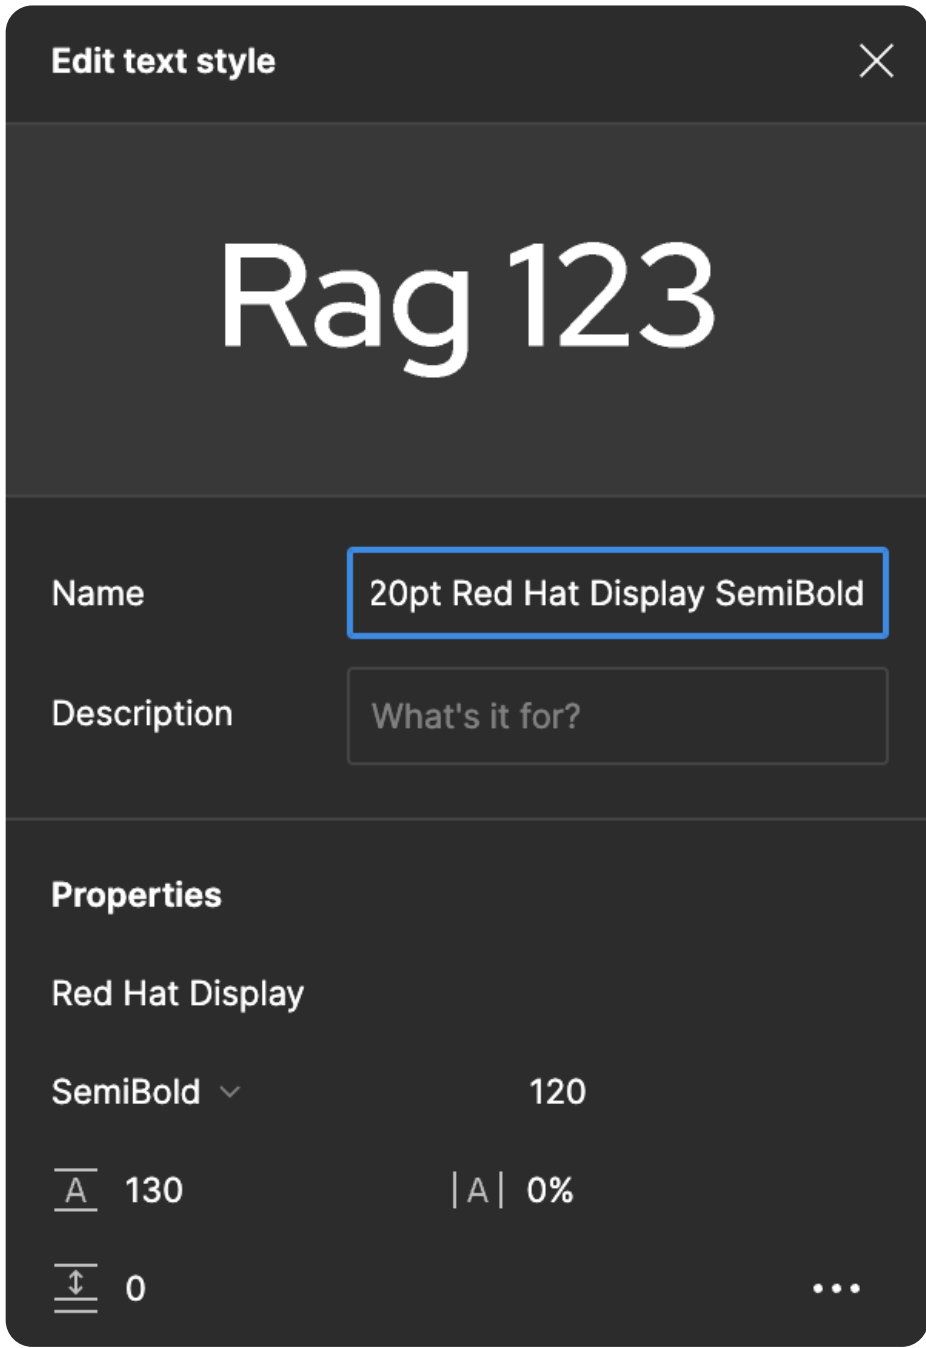

How to edit the styles?

1. Edit the text styles

To edit the text style, click the configuration icon.

2. Edit the text properties

You can edit the font name, weight, size, etc.

Once you edit this configuration, all text that uses this configuration will be automatically adjusted.

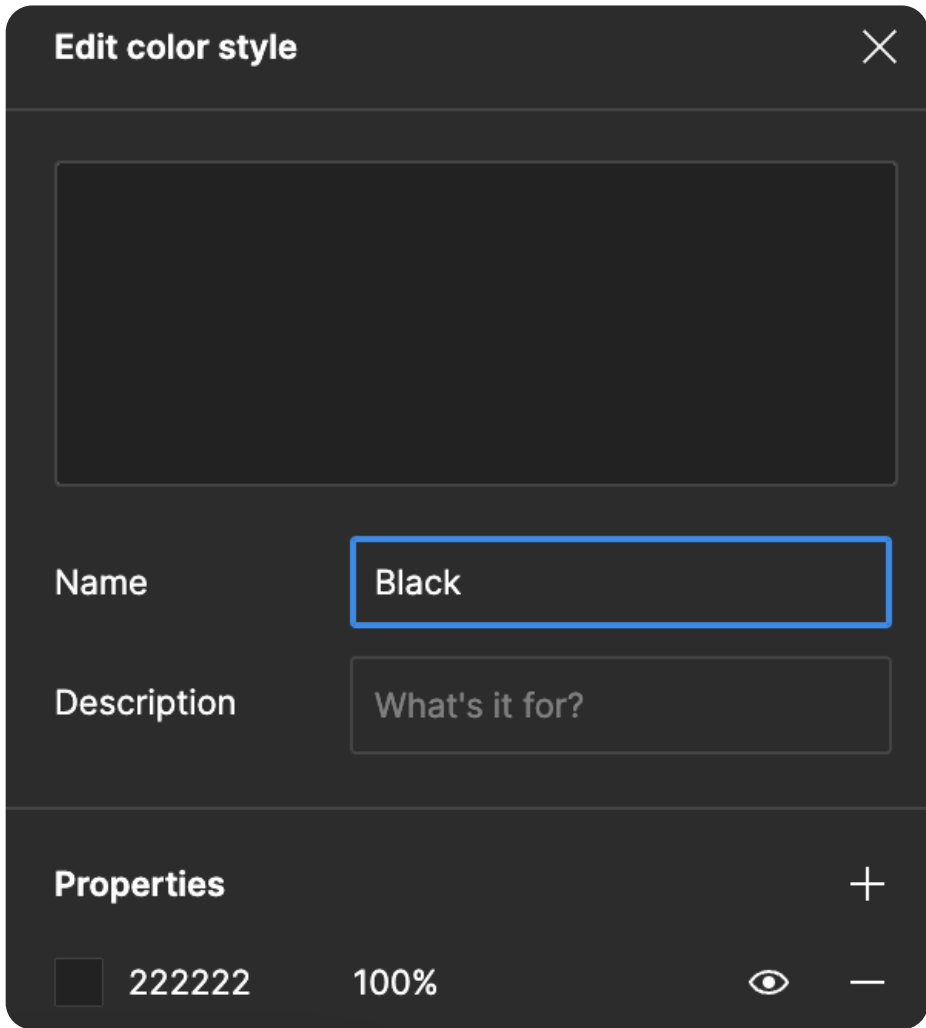

How to edit the styles?

1. Edit the color styles

To edit the color style, click the configuration icon.

2. Edit the color properties

You can edit the color hex code, opacity, and color name.

Once you edit this configuration, all colors that use this configuration will be automatically adjusted.
